

Greetings,

Building a great team at your veterinary practice can be very energizing and productive. With an effective team, everyone understands how to contribute in ways that support practice goals and goes above and beyond what individual staff members may accomplish on their own. But teamwork isn't easy. Even the best teams, with the most well-intentioned staff, can encounter problems that may hinder their collective accomplishments.

It is essential that all staff members, including the receptionist who is directly involved with the client, have a clear understanding of the goals and protocols for their practice so everyone can plan and organize for team success.

The AVCSuccess webinar next month on the topic, "**Team Training & Staff Budgeting**" is designed to teach you strategies and techniques for building a great team at your practice and creating successful team dynamics. You will learn how to align all staff members around shared goals so they can effectively plan, communicate, execute, and deliver the best in veterinary medicine.

## August Webinar - "Team Training & Staff Budgeting Costs"

Join us for Part 8 of the monthly Peak Performance Program. The topic for August is about reaching peak performance by establishing protocols for "Team Training & Staff Budgeting Costs." Each month of the annual program covers a different topic, with the ultimate goal of helping your practice increase annual revenue by up to 9%.

**DVMAX Users - Tues August 14, 2018, 2018 - [Register here!](#)**

**AVImark & All Other Software Users - Wed August 15, 2018 - [Register here!](#)**

Read what this veterinarian has to say about AVCSuccess ...

“ *As a direct result of working with AVCSuccess and their consulting team, we have benefited from more clients, greater client compliance, higher gross and net income, and confidence when making management and policy decisions.*”  
*Dr. Smith, DVM Manchaca, TX*
